

CARDIAC SAFETY RESEARCH CONSORTIUM

Committee Openings and Think Tank Planning

The CSRC has new opportunities to serve for interested members.

Two Committee Openings

The Consortium has openings on the following committees:

- Membership
- Scientific Programs

To join these committees, please contact us at cardiacsafety@dm.duke.edu.

Think Tank Planning

The CSRC is forming a planning committee for the think tank, "**Cardiovascular Safety in Oncology Drug Development**," which is expected to be held in October 2017.

The think tank will examine the evolving cardiac risk profile of cancer therapeutics development. Increasing numbers of oncology clinical trials enroll patients with cardiac risk factors. Additionally, many of the emerging chemotherapeutic agents have known or potential cardio-metabolic complications. This think tank aims to establish a framework from which to make cardiac safety benefit and risk decisions through the drug development lifecycle for cancer therapeutics.

Planning committee members will participate through a series of teleconferences.

If you are interested in joining, please contact us at cardiacsafety@dm.duke.edu by **February 10, 2017**.
